

Superintendent Evaluation (2020-2021)

Evaluation Questions (Presented March 9, 2021)	Superintendent's Response (Due: April 13, 2021)
1. In looking back over the past year what would you like to have done differently if that was possible?	
2. What are you most excited and/or optimistic about in the coming year? Where do you feel there is still the most need for improvement and what are your plans to make that improvement happen?	
3. Relating to community/partner involvement and outreach, measure your success over the past year in communicating the District's goals and educational programs to community partners. Discuss the differences when working to establish relationships with prospective or new partners. ("New" would include those that we broke off our relationships or have never enjoyed a working relationship.)	
4. Do you feel that you have the buy-in of your staff and Administrators for the educational plans you outlined for the next years? If not, how do you get them on board?	
5. With the introduction of numerous new programs: our new math adoption, absenteeism program, the continuation of PBIS and AVID, the upcoming SIA programs, etc... How will you ensure all these programs are being implemented effectively? How will you ensure all the programs are not only successful but successful in advancing student achievement? How will you track the district's progress and communicate that progress to the board and to teachers and staff? What are you doing to ensure our teachers and staff are motivated, inspired, and successful with all the new programs and not overwhelmed?
